### WORK EXPERIENCE (Frontend Developer)

Cofynd Infotech Pvt Ltd

(October 2022 - Present)

- Transformed an outdated, static website with approximately 200 static pages into a dynamic website.
    - Implemented a seamless property search functionality for Residential & Commercial properties, resulting in a 30% increase in user engagement and a 25% rise in lead conversions.
    - Used debouncing in search functionality for better performance.
    - Lazy loading of components and images for faster page loads.
  - Designed and developed a large-scale platform for searching & booking coworking and office spaces.
  - Created an efficient and user-friendly admin panel to manage and store data for all the websites.
    - Used Material UI for a good looking interface.
    - Filter & sort the data by their name, type & status.
    - Change the order of data by drag & drop.
    - Login & Logout functionality and used cookies to store the token.
  - Skilfully managing the company's other websites also, ensuring their seamless operation, engaging design, and relevant content. Responsible for updates, maintenance, and optimizations, contributing to enhanced user experience and overall online presence.
- 

### PROJECTS

- **Propularity - Real Estate Website:** Led the development of a fully dynamic real estate website for searching residential & commercial properties.
    - Employed ReactJs for the front end, along with CSS3 and Bootstrap5 to ensure a responsive and visually appealing design.
    - Integrated GraphQL API for efficient data retrieval and seamless updates.
  - **Spacite:** It is a website where users can search the office space in different cities of India.
    - Technology used: ReactJs, CSS, Bootstrap, Rest APIs for data fetching.
  - **Cloud Nine Rooms:** Developed a dynamic and responsive website for searching Coliving/PGs into Gurugram. The website provides an interactive user interface for booking rooms and exploring amenities.
-
