### PROFILE

Highly proficient in web development with strong technical skills and a rapid learning ability in various technologies. Has extensive experience in HTML, CSS, JavaScript, Bootstrap, ReactJS, NextJS, NodeJS, and MongoDB. With a solid foundation in web development, I have honed my skills and become highly proficient in creating user-friendly and visually appealing websites. My expertise lies in writing clean and efficient code, implementing responsive designs, and ensuring cross-browser compatibility.

### WORK EXPERIENCE

#### Web Developer

Cofynd Infotech Pvt. Ltd.

Feb 2023 - Present

- Designed and developed spacite, a dynamic React website from scratch, utilizing various libraries and technologies to showcase company products/services. Ensured captivating design and seamless functionality, contributing to the company's online presence and growth.
- Created an efficient and user-friendly admin panel using MongoDB, Express, ReactJs, NodeJs to manage and store data for spacite website. Implemented essential features for seamless data management, contributing to improved website maintenance and overall efficiency.
- Initiated and constructed Propularity, a dynamic React-based real estate website, from the ground up, showcasing my expertise in website design and development for the company.
- Skillfully managing company's other websites also, ensuring their seamless operation, engaging design, and relevant content. Responsible for updates, maintenance, and optimizations, contributing to enhanced user experience and overall online presence.
- Integrated new features and enhanced website functionality with the help of cross-functional teams.
- Added customisation and oversaw routine upgrades to guarantee a smooth user experience.
- Employed knowledge of web development and content management to effectively implement changes and enhance performance.

### PROJECTS

- Spacite** : I used React to create this totally dynamic website, and Node.js and Express.js were used for the backend.
- Propularity Real Estate Website** : Led the development of a fully dynamic real estate website, "Propularity," using cutting-edge technologies to provide an immersive user experience. Employed ReactJs for the front end, along with HTML, CSS, and Bootstrap5 to ensure a responsive and visually appealing design. Integrated GraphQL API for efficient data retrieval and seamless updates.
- Cloud Nine Rooms** : Developed a dynamic and responsive website for Cloud Nine Rooms using ReactJs, HTML, CSS, and Bootstrap. The website provides an interactive user interface for booking rooms and exploring amenities. Implemented a modern design to enhance user experience and utilized Bootstrap for responsive web design.
- Portfolio** : This is the website I created for my personal portfolio using ReactJS. I tried to use the following packages: Suspense, Lazy Loading of Components, Responsive, Minimal & Clean Design, React-Scroll, and Typewriter-Effect.
- Shoppingzone** : It is made with ReactJs and I used React context in this project to manage state globally.
